MICHAEL BREEDEN

Solution Design Architect, Slack | AI & Agentic Proofs | MCP | Salesforce Integrations
michaelcbreeden@gmail.com · linkedin.com/in/michaelcbreeden · michaelbreeden.me · Los Angeles, CA

SUMMARY

Slack Solution Design Architect who goes from discovery to a working proof: designing the experience, building it, validating it with real users, and handing it off with the evidence. Hands-on with MCP servers, Slackbot skills, Slack Bolt, and Salesforce APIs, and grounded in how enterprises actually run Slack: administration, Slack Connect, security review, and adoption. Led Salesforce's own internal move off Chatter onto Slack and built working proofs for Salesforce teams as Customer Zero engagements. Five recent proofs of concept for enterprise customers and internal Salesforce teams, three from first call to working demo the same day, and four now in active sales cycles or reviews. 10+ years of customer-facing delivery, enablement, and product feedback.

CORE STRENGTHS

- **Slack platform:** Slack workflows, Workflow Builder, Slack Connect governance, Salesforce Channels, administration, security review, and Slack AI.
- **Applied AI and agents:** MCP server development, Slackbot skills, agent behavior design (act, verify, escalate to a human), grounded assistants with guardrails.
- **Build:** Node.js, Slack Bolt SDK, Block Kit, jsforce / Salesforce API, TypeScript, React.
- **Strategy and storytelling:** Executive and stakeholder advisory; use-case discovery; architecture and decision logs; enablement; reusable programs and patterns.

EXPERIENCE

Slack (Salesforce) — Los Angeles, CA 5 yrs 10 mos

Solution Design Architect | *Feb 2024 – Present*

- **Customer Zero: Salesforce's own Slack deployment.** Slack SME and Solution Design Architect on Salesforce's own internal deployment of Salesforce Channels, leading the company's migration off Chatter onto Slack as its primary collaboration platform: the largest and most complex Salesforce Channels rollout undertaken.
- **Agentic proof (MCP + Slackbot skill).** Built and demoed a Slackbot-to-customer-plugin proof over MCP for a major enterprise software company: an MCP server plus a Slackbot skill that attempts allowlisted actions instead of declining, checks the problem is resolved, and hands off to a human ticket if not. Call to working demo in one day; now in an active sales cycle.
- **Conversational analytics.** For a longstanding enterprise partner, built a custom Slack app with a live dashboard, then extended it into an MCP server so Slackbot answers the same analytics questions conversationally, with no analytics role to grant and no built-in size threshold in the way. Tested and documented; same-day demo.
- **Connected systems.** For one of the most valuable technology companies in the world, showed what works out of the box first, then built only the gap: a bidirectional Slack Connect ↔ Salesforce Case sync (Node.js, Slack Bolt, jsforce). Led ~4 weeks of discovery and now leading it through enterprise security and legal review.
- **Customer Zero: live event proof.** Built a live trivia Slack app for Salesforce's Sports Marketing team at a marquee motorsport activation, from a single 30-minute call, with real-time scoring, anti-cheat timing safeguards, a decision log and a risk assessment; three iterations with the team and now moving through the production rollout process.
- **Tableau Next + Slackbot proof.** For a manufacturing customer, partnered with their Sales Ops, Enablement, and CRM leads to define a Slack + Tableau Next pre-call brief across three workflows: the brief, a customer-facing deck, and mobile data capture. Built a proof-of-concept Slackbot skill that confirms the account in Salesforce, matches contacts to that account to prevent duplicates, queries Tableau Next semantic models over MCP, and generates a standardized canvas, plus a Workflow Builder form that gives Slackbot structured inputs. Proof of concept and discovery stage.
- **Diagnosis and handoff.** Tested Tableau Next and MCP behavior against real Salesforce data; found exact-name matching, empty-result, and canvas-size limits and designed around each. Answered the customer's admin questions on Slackbot permissions by Salesforce object, and wrote the build-approach document: entry criteria, risks, tracking options.

- **Experience design.** Designed a first-of-its-kind Slack + Microsoft Teams interoperability experience for a major enterprise customer, including end-user UX design, cross-platform workflow mapping, and a launch and adoption plan.
- **Senior stakeholder advisory.** Leading implementation and adoption strategy for a major financial services firm across Salesforce Channels, Slack Connect governance, and Workflow Builder automation. Delivering a multi-year managed-services engagement supporting 150,000+ monthly active users, expanding scope into Workflow Builder, Canvas, and Lists. Consistently generate follow-on business through trusted-advisor relationships.

Learning Architect | *Aug 2022 – Feb 2024*

- Highest-utilized Learning Architect at Slack; advised 11 of the top 100 global companies by market cap and trained 25,000+ users, leading the team in utilization for FY23 and FY24.
- Worked across CS, CE, Trailhead, Product, and Sales for clean AE-to-CSM handoffs; sole team member concurrently certified as Salesforce Administrator, Trailhead Double-Star Ranger, Slack Launch Consultant, and GovSlack Consultant while completing an MBA.

Senior Learning Consultant (Oct 2021 – Aug 2022) · Enterprise Learning Consultant (Dec 2020 – Oct 2021)

- Delivered enterprise adoption consulting in Slack's Specialized Services organization; promoted within the first year.

Shift4 (formerly Appetize) — Greater Los Angeles Area Oct 2019 – Dec 2020

Director of Client Education

- Selected, bought, and launched a Learning Management System with all-new content in the first 90 days; built a 3-day new-hire program and a certification program serving thousands of users and 50+ hours of content.

Autodesk Construction Solutions / PlanGrid — Greater Los Angeles Area Oct 2017 – Oct 2019

Professional Services Manager

- Delivered training and consulting to 3,000+ users at a 97% effective/highly-effective rating; Professional Services Manager of the Year (FY2019); led the Southwest region to a 66% YoY increase in services bookings.
- Built the PlanGrid Certified Trainer program (curriculum, exam, instructor manual, portal) for 300+ trainers: a reusable program rather than one-off delivery.
- Partnered with Product to turn customer feedback into shipped features, including PlanGrid Submittals and Advanced RFIs (2019).

Bluebeam, Inc. — Pasadena, CA May 2016 – Oct 2017

Software Trainer – Specialist

- Delivered customized software training, onsite and virtual, for AEC-industry users across the U.S. and Canada, and trained internal staff to scale delivery.

INDEPENDENT BUILDS

- **Gluten-Free Beer Index.** Gemini-powered sommelier grounded in a 240-beer catalog: recommends only listed beers, quotes the test evidence, and never calls a beer "safe." Rate limiting, model fallbacks, and tuned output budgets to handle failures. Built in a day with Claude. (Next.js, TypeScript, PostgreSQL)
- **Status Run Planner.** Goal-first planner that says so when a status gap can't be closed, with live fares where available and clearly labelled estimates otherwise. Deployed prototype built in three days from a phone. (Next.js, MapLibre)
- **MLB Ticket Generator.** Print-accurate ticket stubs from live MLB Stats API data, in real use by real people. (React, TypeScript)

EDUCATION AND CERTIFICATIONS

USC Marshall School of Business, MBA (2019–2022) · San Diego State University, B.S. Management Information Systems · Pasadena City College, A.A. Business Administration

Salesforce Certified Administrator · Salesforce Certified Slack Consultant · Salesforce Certified AI Associate (2025) · Agentblazer Innovator (2026) · Trailhead Four-Star Ranger (525 badges, 201,050 points, 45 trails) · Slack Connect · Skilljar Certified Professional
